Art Unit: 2817

#### **QUAYLE ACTION**

This application is in condition for allowance except for the following formal matters: objections to the drawings and specifications listed below.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

### **Drawings**

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings do not meet requirements set forth under 37 CFR 1.84 (L) where the drawings must permit satisfactory reproduction and/or under sub (P1, P3) where the numbers and characters are not legible and do not appear to meet the minimum height requirements. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

#### Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

# **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in

Application/Control Number: 10/535,236

Art Unit: 2817

upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Applicable headers do not appear to be included in the specification.

## Allowable Subject Matter

Claims 1 – 16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the limitations of the claim. Specifically, Koslover (cited in Applicant's IDS dated October 4, 2005) shows a circular TM01 to TE11 waveguide mode converter comprising plural circular sections (126, 106, 102, 108 110 et al.) however Koslover does not teach or suggest where any section produces a phase shift

Application/Control Number: 10/535,236

Art Unit: 2817

nor would it have been obvious where any section would produce the claimed phase shift where phase is not discussed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Berego shows a microwave load in a waveguide.

De Ronde shows a waveguide mode converter.

Wheeler shows mode separation in a waveguide.

Lerner shows mode separation in a waveguide.

Felsen shows a microwave control device.

King shows a waveguide mode filter.

King shows a waveguide transducer.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean O. Takaoka whose telephone number is (571) 272-1772. The examiner can normally be reached on 8:30a - 5:00p Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
